Introduction

Product Description

The MI987 Mini ITX motherboard is based on the latest Intel® Q87 chipset. The platform supports Intel® 4th Generation Core™ DT i7/i5/i3 processors.

The latest Intel® processors provide advanced performance in both computing and graphics quality. This meets the requirement of customers in the gaming, POS, digital signage and server market segment.

The platform supports two SO-DIMM sockets that can accommodate up to 16GB of DDR3-1600 Non ECC memory. The Intel® 4th Gen. Core™ DT processor integrated HD graphics supports 3 independent displays, Direct X 11.1, OpenGL 3.2, and Open CL 1.2. Display interfaces are for HDMI, DisplayPort and VGA CRT.

With two Gigabit Ethernet, the MI987 Mini ITX board utilizes the dramatic increase in performance provided Intel's latest cutting-edge technology. Expansion is provided by PCIe(4x), two full sized MiniPCie and a half sized MiniPCie. Onboard connectors support 2x SATAIII, 4x or 6x USB 2.0 depending on the MI987 model and 2x COM ports. The board measures 170mm x 170mm.

Checklist

Your MI987 package should include the items listed below.

- The MI987 MINI ITX motherboard
- This User's Manual
- 1 CD containing chipset drivers and flash memory utility
- Cables???????????????

MI987 Specifications

Product Name	MI987AF (Q87) MI987EF (H81) MI987AF-W (Q87) [Optional for iBASE SG]
Form Factor	Mini ITX
CPU Type	- Intel® 4 th Generation Core™ DT i7/i5/i3 processors (22nm monolithic) **Recommend to use low power DT CPU @ TDP 35W/45W**
CPU Speed	Up to 2.7GHz
Cache Size	Up to 8MB
CPU Socket	LGA1150 (Socket H3)
Chipset	Intel® Q87 PCH [MI987AF/MI987AF-W] Intel® H81 PCH [MI987EF] Package =23 mm x 22 mm, 0.65 mm ball pitch
BIOS	AMI BIOS
Memory	Intel® 4 th Gen Core™ DT processors integrated memory controller, - DDR3-1600 MHz@1.5V - SO-DIMM x 2, Max. 16GB (Non-ECC) [Horizontal type]
VGA	Intel® 4 th Gen. Core™ DT processor integrated HD Gfx, supports 3 independent displays, Direct X 11.1, OpenGL 3.2, Open CL 1.2 - HDMI x 1 (Thru port B, with Level shifter PTN3360D) - DisplayPort x 1 (Thru port C) **support DP++** - VGA x 1 (Thru PCH)
LAN	1. Intel® I217LM PHY [MI987AF/-W] or I217V GbE PHY [MI987EF] 2. Intel® I211AT PCIe GbE as 2 nd LAN
USB	USB 2.0 host controller [Q87/H81 Integrated] - [MI987AF/-W] : 6 ports via onboard pin header - [MI987EF] : 4 ports thru pin header, 2 ports @edge I/O connectors - 2 ports via MiniPCIe socket USB 3.0 host controller [Q87 /H81 Integrated] @ edge I/O connectors - USB 3.0 x 4 ports for MI987AF/-W - USB 3.0 x 2 ports for MI987EF
Serial ATA	Intel® Q87/ H81 PCH built-in SATA controller, - 2x SATA 3.0 (6Gbps) - 2 x mSATA [Q87 PCH Port 3/4 for SATA (3.0) or H81 PCH Port 3/4 for SATA(2.0)]
Storage Device	mSATA x 2 thru full-sized/half-sized Mini-PCIe socket @ J12/J13 socket
Audio	Intel® Q87/H81 PCH built-in High Definition Audio controller + Realtek ALC662 w/ 5.1 channels
LPC I/O	Nuvoton NCT5523D (64-pin LQFP [7 mmx7 mm]) - COM #1 (RS232/422/485) support ring-in with power @500 mA (selectable for 5V or 12V) [EXAR SP339EER1 232/422/485 transceiver x 1 for jumper-less] - COM #2 (RS232 only) Hardware Monitor (2 thermal inputs, 4 voltage monitor inputs & 2 Fan headers) - CPU FAN x 2 (PWM/DC type, 4-pin connector type, auto-detection by Nuvoton NCT3943S fan controller)
Digital IO	4 in & 4 out
IAMT 9.0	MI987AF/-W only
TPM 1.2	Infineon SLB9655 [MI987AF/-W only]

Expansion Slots	<ul style="list-style-type: none">- PCIe (4x) x1 [Gen 3.0 PEG] [MI987AF/EF]- MiniPCIe socket x 2 [Full-sized + Half-sized stack type, Full-sized support PCIe/USB/mSATA, Half-sized support mSATA only]- Half-sized socket x 1 (3rd Mini-PCIe@J16, support PCIe / USB)
Edge Connectors	DC-Jack x 1 (C12135112DC102000P) DB9+DB15 stack connector for COM #1 + CRT DP + HDMI stack connector x 1 Dual USB (3.0) + RJ45 stack connector x 2 ** For MI987EF, USB 3.0 @ CN7 is USB2 only** Audio Jack 2 x 1 for MIC-in / Line-out (Reserved for 2-port connector)
Onboard Header/Connector	2 ports x SATA III [Blue color] DF-11 2x4 pins pin-header x 3 for 6 ports USB 2.0 (MI987AF/-W) DF-11 2x4 pins pin-header x 2 for 4 ports USB 2.0 (MI987EF) DF-11 2x6 pins pin-header x 1 for front panel audio DF-11 2x5 pins box header x 1 for COM2 (RS232) 2x5 pins pin-header x1 for Digital IO 4 pins mini-type header for SATA device power x 2 [JST type] 2 x 4 pins pin header x 1 for front I/O (2.54 pitch)
Watchdog Timer	Yes (256 segments, 0, 1, 2...255 sec/min)
System Voltage	$\pm 19V$ DC-in ($\pm 20\%$)
Other	<ul style="list-style-type: none">- LAN Wakeup- EuP/ErP (MI987EF only, thru Super I/O)- iSMART function(TI MSP430G2433 MCU)- Legacy Free from super I/O- AT24C02C EEPROM [SO8 type] via SMBus
Board Size	170mm x 170mm
Operation System	Windows 7, Windows 8

Board Dimensions

Installations

This section provides information on how to use the jumpers and connectors on the MI987 in order to set up a workable system. The topics covered are:

- Installing the Memory錯誤! 尚未定義書籤。
- Setting the Jumpers錯誤! 尚未定義書籤。

Connectors on MI987 錯誤! 尚未定義書籤。

Installing the Memory

The MI987 board supports two DDR3 memory modules for a maximum total of 16GB in DDR3 SODIMM memory type.

Installing and Removing Memory Modules

To install the DDR3 modules, locate the memory slot on the board and perform the following steps:

1. Hold the DDR3 module so that the key of the DDR3 module aligned with that on the memory slot.
2. Gently push the DDR3 module in an upright position until the clips of the slot close to hold the DDR3 module in place when the DDR3 module touches the bottom of the slot.
3. To remove the DDR3 module, press the clips with both hands.

Setting the Jumpers

Jumpers are used on MI987 to select various settings and features according to your needs and applications. Contact your supplier if you have doubts about the best configuration for your needs. The following lists the connectors on MI987 and their respective functions.

Jumper Locations on MI987	8

IN3	7	8	IN1
IN2	9	10	IN0

J4: Front Panel Function Connector

ATX Power ON Switch: Pins 1 and 2

This 2-pin connector is an “ATX Power Supply On/Off Switch” on the system that connects to the power switch on the case. When pressed, the power switch will force the system to power on. When pressed again, it will force the system to power off.

Hard Disk Drive LED Connector: Pins 3 and 4

This connector connects to the hard drive activity LED on control panel. This LED will flash when the HDD is being accessed.

Pin #	Signal Name
4	HDD Active
3	3.3V

Reset Switch: Pins 5 and 6

The reset switch allows the user to reset the system without turning the main power switch off and then on again. Orientation is not required when making a connection to this header.

Power LED: Pins 7 and 8

Pin #	Signal Name
7	+5V
8	GND

J5: SPI Flash Connector (Factory use only)

J6: MCU Flash Connector (factory use only)

BIOS Setup

This chapter describes the different settings available in the AMI BIOS that comes with the board. The topics covered in this chapter are as follows:

BIOS Introduction	24
BIOS Setup	24
Advanced Settings	26
Chipset Settings	36
Boot Settings	41
CSM parameters	42
Security Settings	43
Save & Exit Settings	44

BIOS Introduction

The BIOS (Basic Input/Output System) installed in your computer system's ROM supports Intel processors. The BIOS provides critical low-level support for a standard device such as disk drives, serial ports and parallel ports. It also password protection as well as special support for detailed fine-tuning of the chipset controlling the entire system.

BIOS Setup

The BIOS provides a Setup utility program for specifying the system configurations and settings. The BIOS ROM of the system stores the Setup utility. When you turn on the computer, the BIOS is immediately activated. Pressing the key immediately allows you to enter the Setup utility. If you are a little bit late pressing the key, POST (Power On Self Test) will continue with its test routines, thus preventing you from invoking the Setup. If you still wish to enter Setup, restart the system by pressing the "Reset" button or simultaneously pressing the <Ctrl>, <Alt> and <Delete> keys. You can also restart by turning the system Off and back On again. The following message will appear on the screen:

Press to Enter Setup

In general, you press the arrow keys to highlight items, <Enter> to select, the <PgUp> and <PgDn> keys to change entries, <F1> for help and <Esc> to quit.

When you enter the Setup utility, the Main Menu screen will appear on the screen. The Main Menu allows you to select from various setup functions and exit choices.

Warning: *It is strongly recommended that you avoid making any changes to the chipset defaults. These defaults have been carefully chosen by both AMI and your system manufacturer to provide the absolute maximum performance and reliability. Changing the defaults could cause the system to become unstable and crash in some cases.*

Main Settings

					F4: Save & Exit
					ESC: Exit

Active Processor Cores

Number of cores to enable in each processor package.

Limit CPUID Maximum

Disabled for Windows XP.

Execute Disable Bit

XD can prevent certain classes of malicious buffer overflow attacks when combined with a supporting OS (Windows Server 2003 SP1, Windows XP SP2, SuSE Linux 9.2, RedHat Enterprise 3 Update 3.)

Intel Virtualization Technology

When enabled, a VMM can utilize the additional hardware capabilities provided by Vanderpool Technology.

Boot performance mode

Select the performance state that the BIOS will set before OS handoff.

EIST

Enable/Disable Intel Speedstep

Intel TXT(LT) Support

Enables or Disables Intel (R)TXT (LT) Support.

SATA Configuration

SATA Devices Configuration.

Watchdog			Disabled		F3: Optimized Defaults
OS Timer			0		F4: Save & Exit
BIOS Timer			0		ESC: Exit

AMT configuration is supported only with MI987AF (with iAMT function).

Intel AMT

Enable/Disable Intel (R) Active Management Technology BIOS Extension.

Note: iAMT H/W is always enabled. This option just controls the BIOS extension execution. If enabled, this requires additional firmware in the SPI device.

BIOS Hotkey Pressed

OEMFLag Bit 1: Enable/Disable BIOS hotkey press.

AMT Configuration

OEMFLag Bit 2: Enable/Disable MEBx selection screen.

Hide Un-Configure ME Configuration

OEMFLag Bit 6: Hide Un-Configure ME without password Confirmation Prompt.

Un-Configure ME

OEMFLag Bit 15: Un-Configure ME without password.

Amt Wait Timer

Set timer to wait before sending ASF_GET_BOOT_OPTIONS.

Activate Remote Assistance Process

Trigger CIRA boot.

USB Configure

Enable/Disable USB Configure function.

PET Progress

User can Enable/Disable PET Events progress to receive PET events or not.

Watchdog Timer

Enable/Disable Watchdog Timer.

USB Configuration

Aptio Setup Utility – Copyright © 2012 American Megatrends, Inc.

Main	Advanced	Chipset	Boot	Security	Save & Exit
USB Configuration					
USB Module Version			8.10.28		
USB Devices:					
2 Keyboards, 1 Mouse, 2 Hubs					
Legacy USB Support			Enabled		
USB3.0 Support			Enabled		
XHCI Hand-off			Enabled		
EHCI Hand-off			Enabled		
USB Mass Storage Driver Support			Enabled		
USB hardware delays and time-outs:					
USB Transfer time-out			20 sec		
Device reset time-out			20 sec		
Device power-up delay			Auto		

→ ← Select Screen
 ↑ ↓ Select Item
 Enter: Select

 F1: General Help
 F2: Previous Values
 F3: Optimized Defaults
 F4: Save & Exit
 ESC: Exit

Legacy USB Support

Enables Legacy USB support.

AUTO option disables legacy support if no USB devices are connected.

DISABLE option will keep USB devices available only for EFI applications.

USB3.0 Support

Enable/Disable USB3.0 (XHCI) Controller support.

XHCI Hand-off

This is a workaround for OSes without XHCI hand-off support. The XHCI ownership change should be claimed by XHCI driver.

EHCI Hand-off

This is a workaround for OSes without EHCI hand-off support. The XHCI ownership change should be claimed by EHCI driver.

USB Mass Storage Driver Support

Enable/Disable USB Mass Storage Driver Support.

USB Transfer time-out

The time-out value for Control, Bulk, and Interrupt transfers.

Device reset time-out

USB mass Storage device start Unit command time-out.

Device power-up delay

Maximum time the device will take before it properly reports itself to the Host Controller. 'Auto' uses default value: for a Root port it is 100ms, for a Hub port the delay is taken from Hub descriptor.

Reset system setup without saving any changes.

Save Changes

Save Changes done so far to any of the setup options.

Discard Changes

Discard Changes done so far to any of the setup options.

Restore Defaults

Restore/Load Defaults values for all the setup options.

Save as User Defaults

Save the changes done so far as User Defaults.

Restore User Defaults

Restore the User Defaults to all the setup options.

Drivers Installation

This section describes the installation procedures for software and drivers. The software and drivers are included with the motherboard. If you find the items missing, please contact the vendor where you made the purchase. The contents of this section include the following:

Intel Chipset Software Installation Utility	46
VGA Drivers Installation	47
Realtek HD Audio Driver Installation	48
LAN Drivers Installation	49
Intel® Management Engine Interface	50
Intel® USB 3.0 Drivers	51

IMPORTANT NOTE:

After installing your Windows operating system, you must install first the Intel Chipset Software Installation Utility before proceeding with the drivers installation.

Intel Chipset Software Installation Utility

The Intel Chipset Drivers should be installed first before the software drivers to enable Plug & Play INF support for Intel chipset components. Follow the instructions below to complete the installation.

1. Insert the DVD that comes with the board. Click **Intel** and then **Intel(R) 8 Series Chipset Drivers**.

2. Click **Intel(R) Chipset Software Installation Utility**.

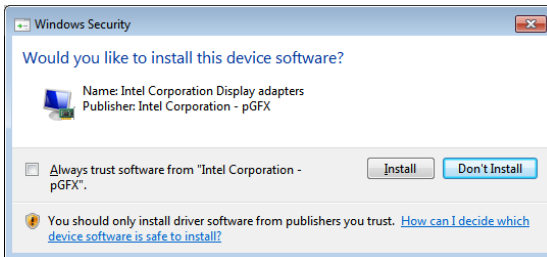

3. When the Welcome screen to the Intel® Chipset Device Software appears, click **Next** to continue.
4. Click **Yes** to accept the software license agreement and proceed with the installation process.
5. On the Readme File Information screen, click **Next** to continue the installation.
6. The Setup process is now complete. Click **Finish** to restart the computer and for changes to take effect.

VGA Drivers Installation

1. Insert the DVD that comes with the board. Click **Intel** and then **Intel(R) 8 Series Chipset Drivers**. Click **Intel(R) Graphics Driver**.

2. When the Welcome screen appears, click **Next** to continue.
3. Click **Yes** to agree with the license agreement and continue the installation.
4. On the Readme File Information screen, click **Next** to continue the installation of the Intel® HD Graphics Driver.
5. On the screen shown below, click **Install** to continue.

6. On the Setup Progress screen, click **Next** to continue.
7. Setup complete. Click **Finish** to restart the computer and for changes to take effect.

Realtek HD Audio Driver Installation

1. Insert the DVD that comes with the board. Click **Intel** and then **Intel(R) 8 Series Chipset Drivers**. Click **Realtek High Definition Audio Driver**.

2. On the Welcome to the InstallShield Wizard screen, click **Next** to proceed with and complete the installation process.

3. The InstallShield Wizard Complete. Click **Finish** to restart the computer and for changes to take effect.

LAN Drivers Installation

1. Insert the DVD that comes with the board. Click **Intel** and then **Intel(R) 8 Series Chipset Drivers**. Click **Intel(R) PRO LAN Network Drivers**.

2. Click **Install Drivers and Software**.

4. When the Welcome screen appears, click **Next**.

5. Click **Next** to agree with the license agreement.

6. Click the checkbox for **Drivers** in the Setup Options screen to select it and click **Next** to continue.

7. The wizard is ready to begin installation. Click **Install** to begin the installation.

8. When InstallShield Wizard is complete, click **Finish**.

Intel® Management Engine Interface

The following application requires Microsoft .NET Framework 3.5 or later: Intel® Management Engine Components. Please install the latest version of Microsoft .NET Framework from Microsoft Download Center to run this application correctly.

Follow the steps below to install the Intel Management Engine.

1. Insert the DVD that comes with the board. Click **Intel** and then **Intel(R) 8 Series Chipset Drivers** and then **Intel(R) ME 9.0 Drivers**.

2. When the Welcome screen to the InstallShield Wizard for Intel® Management Engine Components, click the checkbox for **Install Intel® Control Center** & click **Next**.
3. Click **Yes** to agree with the license agreement.
4. When the Setup Progress screen appears, click **Next**. Then, click **Finish** when the setup progress has been successfully installed.

Intel® USB 3.0 Drivers

1. Insert the DVD that comes with the board. Click **Intel** and then **Intel(R) 8 Series Chipset Drivers**. Click **Intel(R) USB 3.0 Drivers**.

2. When the Welcome screen to the InstallShield Wizard for Intel® USB 3.0 eXtensible Host Controller Driver, click **Next**.

3. Click **Yes** to agree with the license agreement and continue the installation.

4. On the Readme File Information screen, click **Next** to continue the installation of the Intel® USB 3.0 eXtensible Host Controller Driver.

5. When the Setup Progress screen appears, click **Next**. Setup complete. Click **Finish** to restart the computer and for changes to take effect.

This page is intentionally set blank.

Appendix

A. I/O Port Address Map

Each peripheral device in the system is assigned a set of I/O port addresses which also becomes the identity of the device. The following table lists the I/O port addresses used.

Address	Device Description
0000h-001Fh	Direct memory access controller
0000h-001Fh	PCI bus
0040h-0043h	System timer
0050h-0053h	System timer
0070h-0077h	System CMOS/real time clock
0081h-0091h	Direct memory access controller
0093h-009Fh	Direct memory access controller
00C0h-00DFh	Direct memory access controller
00F0h-00F0h	Numeric data processor
02F8h-02FFh	Communications Port (COM2)
03B0h-03BBh	Intel(R) HD Graphics 4600
03C0h-03DFh	Intel(R) HD Graphics 4600
03F8h-03FFh	Communications Port (COM1)
0D00h-FFFFh	PCI bus
E000h-EFFFh	Intel(R) 8 Series/C220 Series PCI Express Root Port #7 - 8C1C
F000h-F03Fh	Intel(R) HD Graphics 4600
F040h-F05Fh	Intel(R) 8 Series/C220 Series SMBus Controller - 8C22
F060h-F07Fh	Intel(R) 8 Series/C220 Series SATA AHCI Controller - 8C02
F0A0h-F0A3h	Intel(R) 8 Series/C220 Series SATA AHCI Controller - 8C02
F0B0h-F0B7h	Intel(R) 8 Series/C220 Series SATA AHCI Controller - 8C02
F0C0h-F0C3h	Intel(R) 8 Series/C220 Series SATA AHCI Controller - 8C02
F0D0h-F0D7h	Intel(R) 8 Series/C220 Series SATA AHCI Controller - 8C02
F0E0h-F0E7h	Intel(R) Active Management Technology - SOL (COM3)

B. Interrupt Request Lines (IRQ)

Peripheral devices use interrupt request lines to notify CPU for the service required. The following table shows the IRQ used by the devices on board.

Level	Function
IRQ0	System Timer
IRQ3	Serial Port #2
IRQ4	Serial Port #1
IRQ 10	Intel(R) 8 Series/C220 Series SMBus Controller - 8C22
IRQ 13	Numeric data processor
IRQ 16	High Definition Audio Controller
IRQ 16	Intel(R) 8 Series/C220 Series USB EHCI #2 - 8C2D
IRQ 16	Intel(R) Management Engine Interface
IRQ 19	Intel(R) 8 Series/C220 Series SATA AHCI Controller - 8C02
IRQ 19	Intel(R) Active Management Technology - SOL (COM3)
IRQ 22	High Definition Audio Controller
IRQ 23	Intel(R) 8 Series/C220 Series USB EHCI #1 - 8C26

}
//-----
```

D. Watchdog Timer Configuration

The WDT is used to generate a variety of output signals after a user programmable count. The WDT is suitable for use in the prevention of system lock-up, such as when software becomes trapped in a deadlock. Under these sorts of circumstances, the timer will count to zero and the selected outputs will be driven. Under normal circumstance, the user will restart the WDT at regular intervals before the timer counts to zero.
